

PLANET BATH BOMBS

Materials

- 150g bicarbonate of soda
- favourite smelling shower gel
- food colouring
- water

What to do.

- **Put the bicarbonate of soda in a bowl-** Measure out 150g of bicarbonate of soda and place it in a clean bowl.
- **Add 2 squeezes of your favourite smelling shower gel-** once you squeeze it in mix it well -you can add a few drops of water as needed -you want to get it to a consistency were it is able to be moulded with your hands.
- **Separate into several bowls.** Add a drop or two of food colouring into the mixtures - make each mixture a different colour..
- **Start to mould the mixture into a sphere using your hands - mix the colours to make it look like it like a cool planet.** You can make several small planets or one large planet.
- **Leave the planet bath bombs to dry for a few hours -** then you can run a bath and pop them in - watch as your planet fizzes and dissolves.
