

ROCKET STRAWS

Materials

- Card
- Sellotape
- Colouring Pens
- 2 Different Straws - one that fits inside the other
- Scissors

What to do.

- **On your piece of card draw a rocket ship** - once you have it drawn you can colour it in and make it look amazing. Think about the type of shuttles that go into space, or ones you have maybe seen in films or cartoons. Your Rocket can be as colourful and creative as you want to make it.
- **Cut out your rocket ship** - Once you have your rocket ship coloured in then you need to cut it out. Carefully cut around the outside of your rocket ship - make sure you get an adult to help if you need.
- **Take the Big Straw (the thickest one) and cut of a piece about 3cm long.** Again be careful using your scissors and if you need ask an adult to help. Once you have the 3cm piece cut you are going to seal one end - you could staple it or sellotape it closed. This means when the small straw slides inside it, it won't go all the way through.
- **Sellotape the 3cm straw piece to your rocket ship.** When you attach it make sure the sealed end of the straw is at the top and the open end pointing down the way. Make sure you don't put the tape on too tight - you should still be able to get the small straw to slide into the piece of the bigger straw.
- **Slot the smaller straw into the piece of bigger straw and blow.** Hold the rocket and straw above your head - you can do a count down from 5 or 10 and then blow into the straw really hard like you are blowing bubbles in a drink. This should make your rocket launch into the air.
